

The Fresh-Aire UV Airborne Duct System

A great commercial indoor air quality product for businesses.

Installed directly into HVAC ducts to maximize exposure time with the air, the Fresh-Aire UV Airborne Duct System effectively kills off dangerous pathogens such as viruses, bacteria, and mold spores.

The system features Fresh-Aire UV high-output germicidal UV lamps, which sterilize airborne biological contaminants as they pass by.

The commercial Airborne Duct System is fully customizable to best fit your business needs and size. The commercial indoor air quality solution is the perfect application for hospitals, medical practices, dental offices, gyms, yoga studios, child care centers, restaurants, office spaces, retail, and more businesses where airborne pathogens are a high health risk.

BENEFITS

- Kills airborne microbial contaminants
- Reduces indoor odors
- Improves indoor air quality
- Improves workplace safety
- Chemical free air disinfection
- Cost effective

EFFECTIVE AGAINST

- Bacteria
- Viruses
- Allergens
- Mold

INCLUDES
